Document Chinese Title: 13.3" (A) (G133 series)TFT-LCD 進料檢驗規範

Document English Title: Incoming Inspection Standard For 13.3" (A) (G133 series) TFT-LCD Modules

1. Scope:

1.1 The incoming inspection standards shall be applied to TFT-LCD Modules (hereinafter called ""Modules"") that supplied by AU Optronics Corporation (hereinafter called ""seller"").

1.2 Specifications contains

- Electrical inspection specification
- Appearance specification
- Outside dimension specification

2. Incoming inspection:

The buyer (customer) shall inspect the modules within twenty calendar days since the delivery date (the "inspection period"") at its own cost. The results of the inspection (acceptance or rejection) shall be recorded in writing, and a copy of this writing will be promptly sent to the seller.

The buyer may, under commercially reasonable reject procedures, reject an entire lot in the delivery involved. Within the inspection period, if the samples of modules within a lot show a number of unacceptable defects in accordance with this incoming inspection standards, the buyer must notify the seller in writing of any such rejection promptly, and not later than within three business days in the end of the inspection period.

Should the buyer fail to notify the seller within the inspection period, the buyer's right to reject the modules shall be lapsed and the modules shall be deemed to have been accepted by the buyer.

3. Inspection sampling method:

Unless otherwise agree in writing, the method of incoming inspection shall be based on MIL-STD-105E.

- 3.1 Lot size: Quantity per shipment lot per model.
- 3.2 Sampling type: Normal inspection, single sampling.
- 3.3 Sampling level: Level II.
- 3.4 Acceptable quality level (AQL):

Major defect: AQL=1.0%. Minor defect: AQL=2.5%.

Rig.1: Inspection Sampling standard for MIL-STD-105E:

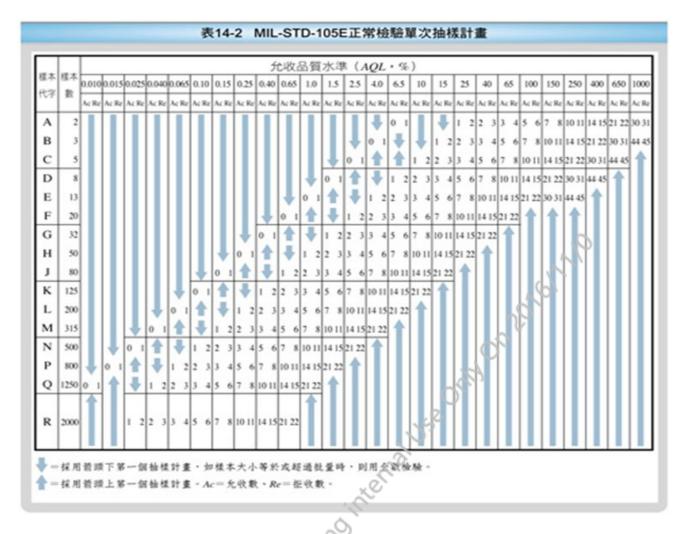

表14	4-1 MI	L-STD	-105E	核本件	等		
批量 特殊檢驗水準 一般檢驗水準							
	S=1	S-2	S/3	S-4	I	II	Ш
2~8	A	(A)	A	A	A	A	В
9~15	A %	M	A	A	A	В	C
16~25	_A) A	В	В	В	C	D
26~50	W-	В	В	C	C	D	E
51~90	В	В	C	C	C	Е	F
91~150	В	В	C	D	D	F	G
151~280	В	C	D	E	E	G	Н
281~500	В	C	D	E	F	Н	J
501~1,200	C	C	E	F	G	J	K

150,001~500,000	D	Е	G	J	M	P	Q
500,000以上	D	Е	Н	K	N	Q	R

Document Chinese Title: 13.3" (A) (G133 series)TFT-LCD 進料檢驗規範

Document English Title: Incoming Inspection Standard For 13.3" (A) (G133 series) TFT-LCD Modules

Rig.2 Incoming inspection judgment method:

4. Inspection instruments:

- 4.1 Pattern generator: LD-2000 or equivalent model.
- 4.2 Video board: AU video board or equivalent. The output of the signal should comply with the specification provided by AU.
- 4.3 Luminance colorimeter: Topcon BM-7 or equivalent model

5. Inspection environment conditions:

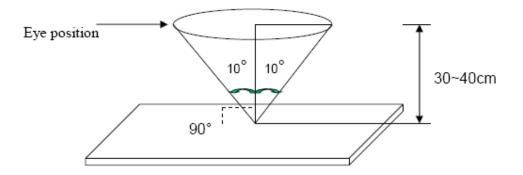

- 5.1 Room temperature: 20 ~ 25 C.
- 5.2 Humidity: **65±5**% RH.
- 5.3 Illumination: Fluorescent light (Day-Light Type) display surface illumination to be **300 ~ 700** lux. (standard **500** lux.)
- 5.4 To be a distance about 35 ± 5 cm in front of LCD unit, viewing line should be perpendicular to the surface of the module judge the visual appearance with human's eyes.
- 5.5 Take off the protector of polarizer while judging the display area.

Document Chinese Title: 13.3" (A) (G133 series)TFT-LCD 進料檢驗規範

Document English Title: Incoming Inspection Standard For 13.3" (A) (G133 series) TFT-LCD Modules

5.6 If there is any question while judging, check the panel again while operating.

6. Classification of defects:

Defects are classified as major defects and minor defects according to the degree of defectiveness defined herein.

Major defects:

A major defect is a defect that is likely to result in failure, or to reduce materially the usability of the product for its intended purpose.

Minor defects:

A minor defect is either a defect that is not likely to reduce materially the usability of the product for its intended purpose, or a departure from an intended purpose with little bearing on the effective use or operation of the product.

6.1 Electrical inspection specification:

	Inspection Item	Specification	
Line defect		Not allowed	
Bright dots		≦2 dot	
Dark dots		≦3 dots	
Total dots de	efect	≦5 dots	
	Two continuous bright dots :	Not allowed	
Continuous	Over three continuous bright dots (vertical, horizontal,	Not allowed	
defect	oblique):	Not allowed	
	Two continuous dark dots (vertical, horizontal, oblique) :	≦2 pair	
	Over three continuous dark dots (vertical, horizontal, oblique):	Not allowed	
	Two continuous dark dots and bright dots	<1	
	(vertical, horizontal, oblique) :	≦1 pair	
	Over three continuous dots (vertical, horizontal, oblique) :	Not allowed	
	Distance between 2 Bright dots :	≥ 50 mm	

Document Chinese Title: 13.3" (A) (G133 series)TFT-LCD 進料檢驗規範

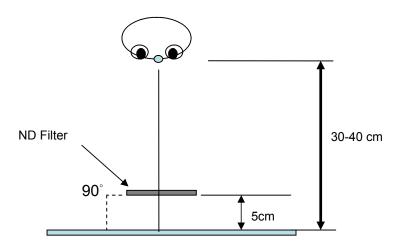

Document English Title: Incoming Inspection Standard For 13.3" (A) (G133 series) TFT-LCD Modules

Distance between 2 Dark dots :	≥ 50 mm
Distance between Dark dot and Bright Dot :	≥ 50 mm
Mura	5 % ND filter

Note 1) For dot defect, one sub pixel is defined as one dot. Defect area (of dot defect) should be larger than 1/2 area of one sub-pixel to be count as 1 dot defect.

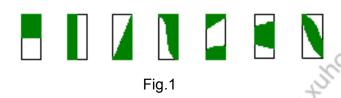

Note 2) Judgment criteria (For Bright dot and Small Bright dot): Using ND Filter 5% (distance: 30 cm). If it could be observed, dot defines as one bright dot. If not, dot defines as one small bright dot.

ND filter use method: The inspection method of ND Filter - holding ND filter in front of the panel around 5 cm and examine the panel from **35±5** cm in the front view for **3** seconds.

Note 3) A dot defect that is smaller than the defined dot defect will be treated as small bright dot.

The drawing of 1/2 area sub-pixel definition: The 1/2 area sub-pixel can be defined as below one or more of specific shapes (Fig.1). The small bright dots is less than or equal to 5 dots.

Note 4) All bright dot defects should not be noticeable by observer under specified inspection environment (Please refer to item 5).

Note 5) Adjacent-dot defect should be observed under the same display pattern in any one of Black/Green/Blue/Red pattern.

Definition of two continuous bright dots: Only for two continuous dots (included vertical, horizontal, oblique type)

*Inspection pattern: Standard inspection patterns of dot defect are listed below. AU uses these patterns as standard

Document Chinese Title: 13.3" (A) (G133 series)TFT-LCD 進料檢驗規範

Document English Title: Incoming Inspection Standard For 13.3" (A) (G133 series) TFT-LCD Modules

criteria for judging dot defect. Please inform AU if any other pattern is to be used to examine dot defect.

Test Pattern	Defect
Black	For bright dot(s)
Red	For bright and dark dot(s)
Green	For bright and dark dot(s)
Blue	For bright and dark dot(s)

Note 6) In three (or more) adjacent dot defect, for any 3rd dot that adjacent to 2 continuous defective dots (can be of any combination of bright dots and dark dots), the 3rd dot, no matter how large it may be, should be viewed as a dot.

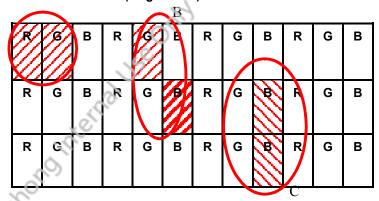

Note 7) Defect criteria diagram

Dot defect diagram

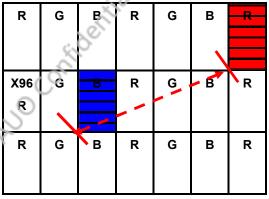

One dot (Bright /Dark)

R G B

Two continuous dots(Bright/Dark)

Definition of distance between defect dcts as following

A: Distance between defect dots

Defect Dot

Note 8) Unless otherwise specified by written document or limit samples, Mura (display un-uniformity) should inspected under the ND filter and shall be accepted when it is invisible 5 % ND filter is applied.

Document Chinese Title: 13.3" (A) (G133 series)TFT-LCD 進料檢驗規範

Document English Title: Incoming Inspection Standard For 13.3" (A) (G133 series) TFT-LCD Modules

Note 9) While operating over 50° C ambient temperature, there should be no function failure occur and Mura (display un-uniformity) should be invisible under 1% ND filter applied.

Note 10) Image Retention: Image retention must be disappeared in 1 sec after pattern changed. / Image retention must be disappeared in 3 sec after turn off power.

6.2 Inspection specification

Judge area	Judge	itom	Inspection specification				criterion
Juuge area	Judge	iteiii	inspection specification			Major	Minor
Active area	Particles,	Circular	Average diameter: D (mm) Distance: ND(mm)		Numbers		\circ
					Disregarded	-

Document Chinese Title: 13.3" (A) (G133 series)TFT-LCD 進料檢驗規範

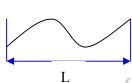

Document English Title: Incoming Inspection Standard For 13.3" (A) (G133 series) TFT-LCD Modules

	Crease	Allowed	0	
		(Word can be read. Barcode can be scanned)		
	Label overlapping	Allowed	0	
Screw	Not enough (Q'ty)	No allowed	0	
	Loose	No allowed	0	
Connector	Appearance	No broken, rising, deformation	0	

Note 1: When L>=2W, defect count as liner defect.

Note 2: D=(W+L)/2

Note 3: Extraneous substances which can be wiped out, such as fingerprint and particles are not considered as a defect.

Note 4: Defects on the Black Matrix (outside Active Area 0.3mm) are not considered as a defect.

7. Inspection judgement:

- 7-1 The judgement of the shipped lot (acceptance or rejection) should follow the sampling plan of MIL-STD-105E, single sampling, normal inspection, level II.
- 7-2 If the number of defects is equal to or less than the applicable acceptance level, the lot shall be accepted.
- 7-3 If the number of defects is more than the applicable acceptance level, the lot shall be rejected and the buyer should inform the seller of the result of incoming inspection in writing

8 Precaution:

Please pay attention to the following items when you use the LCD Module with back-light unit.

- Do not twist or bend the module and prevent the unsuitable external force for display module during assembly.
- 2. Adopt measures in adequately ventilated environment. Be sure to use the module in the specified temperature range.
- 3. Avoid dust or oil mist during assembly.
- 4. Follow the correct power sequence while operating. Do not apply the invalid signal, otherwise, it will cause improper shut down and damage the module.
- 5. Try to avoid the electrical magnetic interference, and it will be more safety and less noise.
- 6. Please operate module in suitable temperature. The response time & brightness will drift by different temperature.
- 7. Avoid displaying the fixed pattern (exclude the white pattern) in a long period, otherwise, it will cause image sticking.
- 8. Be sure to turn off the power when connecting or disconnecting the circuit.
- 9. Display surface Polarizer scratches easily, please avoid dirt and stains carefully.
- 10. A dewdrop may lead to destruction. Please wipe off any moisture before using module.

Document Chinese Title: 13.3" (A) (G133 series)TFT-LCD 進料檢驗規範

Document English Title: Incoming Inspection Standard For 13.3" (A) (G133 series) TFT-LCD Modules

- 11. Sudden temperature changes cause condensation, and it will cause polarizer damaged.
- 12. High temperature and humidity may degrade performance. Please do not expose the module to the direct sunlight and so on.
- 13. Avoid any acid or chlorine compounds, which are harmful to the LCD module.
- 14. Static electricity will damage the modules; please do not touch the module without any grounded device connected.
- 15. Do not disassemble and reassemble the module by self.
- 16. Do not touch the rear side directly to avoid the electrical shock by the backlight high voltage.
- 17. Avoid strong vibration or shock, or it will cause the module broken.
- 18. Store the modules in suitable environment with regular packing.
- 19. Be careful of injury from a broken display module. Please avoid the pressure adding to the surface (front or rear side) of modules, because it will cause the non-uniformity or other function issue to display.
